Education

Northeastern University, Boston, MA

Sept 2021 - April 2026

Khoury College of Computer Sciences

Bachelor of Science in Computer Science & Business Administration

Concentration: **Finance** | Minor: **Data Science**

Relevant Coursework: Algorithms & Data | Software Engineering | Databases | Investments | Mergers & Acquisitions
Foundations of Data Science

Technical Projects

Sports Prediction League ([Web-App](#) | [GitHub](#))

Jan 2026

React, TypeScript, Vite, Tailwind, Node.js, Express, PostgreSQL (Neon), Better Auth, Resend, Vitest, Vercel, Railway

- **Built and shipped a full-stack soccer score prediction platform** where users join private leagues via invite codes and submit exact-score picks for each gameweek.
- Used by **50 active users** across 3 private leagues, **handling 1,400 predictions** per gameweek.
- **Enforced prediction deadlines** with **server-side checks and database transactions**, locking submissions before kickoff and **displaying live countdown timers in the UI**.
- Integrated football-data.org with **automated fixture syncing** via **cron jobs** to keep schedules and results up to date.
- **Normalized** match, team, and fixture data into a **PostgreSQL schema**.
- **Implemented scoring and computed league leaderboards using aggregation queries**.
- **Secured the application** with session-based HTTP-only cookies, email verification, input sanitization, and parameterized queries, protected admin routes via access controls.
- **Built a responsive React dashboard** with **real-time validation** and a **demo mode** for unauthenticated users.
- **Wrote extensive unit tests** with Vitest across core logic and APIs to ensure correctness and prevent regressions.

Personal Portfolio & Freelance Platform

Jan 2026

- Designed and deployed a production-grade **personal portfolio** to showcase full-stack work, **drive inbound freelance inquiries**, and centralize professional branding.
- Built a responsive **single-page application** with animated UI/UX, clear project narratives, and **direct contact pathways** to support client acquisition.
- Implemented a **secure contact system** with backend email delivery and **IP-based rate limiting** to prevent abuse while **maintaining reliable client communication**.
- Developed a **full-stack architecture** using React, TypeScript, and an Express API backed by PostgreSQL, **emphasizing maintainability and clean data flow**.
- Optimized SEO with **structured metadata**, **Open Graph previews**, and **multilingual keyword targeting** to improve discoverability across U.S. and Middle East markets.

Work Experience

Internship, MyAfrica, Cape Town, South Africa (remote)

May - July 2025

- Designed and deployed **custom AI workflows** using ChatGPT tailored to **internal business processes** and needs.
- Worked with **non-technical stakeholders** to translate **loose workflows** into structured, repeatable **AI solutions**.
- Improved operational efficiency by **automating routine tasks** and **developing targeted prompt strategies**.

Mentor, Khoury College of Computer Sciences, Boston, United States

June - Dec 2024

- Mentored **undergraduate computer science students** on **career development**.

Co-op, Wasserman Media Group, London, United Kingdom

May - July 2024

- Conducted **data analysis** for European soccer clients using **Microsoft Excel**, focusing on **detailed player profiles**.
- **Analyzed minutes played** across both international and domestic leagues, utilizing **advanced Excel functions**, pivot tables, and data visualization **techniques to identify patterns in workload**.

Treasury Intern, Jordan International Bank, London, United Kingdom

Feb - March 2024

- Analyzed **bond movements** and **yield trends** to **support short-term investment** decisions and risk assessments.
- Assisted in monitoring **the bank's short-term investment portfolio**, supporting **liquidity and return** objectives.

Assistant Relationship Manager, Arab Jordan Investment Bank, Amman, Jordan

July - Aug 2023

- Performed financial analysis for **corporate credit applications**, supporting **lending and risk evaluation** decisions.
- Supported **client transactions** and **overdrafts** in coordination with internal teams.
